**NALOXONE CHECKLIST FOR PRESCRIPTION**  
*(please read questions to participant and check off responses given)*

**1. Please describe two things that you can do to prevent overdose.**

**2. What are two signs of opiate overdose?**

**3. Please describe how you would do rescue breathing.** *(entire description or a demonstration is required)*

**4. Where on someone's body can you inject naloxone?**

**5. If someone does not respond to a dose of naloxone, how long should you wait to administer a second dose?**

**6. If you are witnessing an overdose, in what order do you do the following things?  
(Number the following 1 – 6)**

- \_\_\_\_\_ **Naloxone Injection** – Inject 1 cc into upper arm, thigh, or butt;
- \_\_\_\_\_ **Call 911** – If person cannot be awakened
- \_\_\_\_\_ **Rescue breathing** (clean out mouth, 2 quick breaths, 1 breath every 5 seconds)
- \_\_\_\_\_ **Evaluate** – Did rescue breathing work - are they doing better? Can you get naloxone and prepare it quickly enough that they won't go for too long without breathing?
- \_\_\_\_\_ **Try to Awaken Person** – Yell person's name, chest noogie
- \_\_\_\_\_ **Further Support** – Are they breathing on their own? Is another dose of naloxone needed? Naloxone wears off in 30-90 minutes. Seek help, comfort the person, and make sure they do not use again.

PARTICIPANT SUCCESSFULLY COMPLETED THE QUIZ.

PARTICIPANT WAS UNABLE TO ANSWER ALL QUIZ QUESTIONS CORRECTLY.
